

Does your Height Have an Effect on Your Life Expectancy?

By: James Sampugnaro

Does your Height Have an Effect on Your Life Expectancy?

For every one centimeter grown in height, your life expectancy increase 0.83 years

$$y = 0.829x + 68.84$$

p value = 0.000

A p value of 0 suggests that there is little to no relationship between height and life expectancy
