

Is there a relationship between GDP per Capita and Life Expectancy?

Ava Carragher, Riley Widdop, and Lauren Stuccio

Null hypothesis:

There is no relationship between GDP per capita and Life expectancy

Alternative Hypothesis:

There is a relationship between GDP per Capita and Life Expectancy.

Regression Results: GDP per Capita vs Life Expectancy

Every 1 unit increase in GDP per Capita, Life Expectancy increases by 0.0002 years

$$\text{Life expectancy} = 68.14 + 0.0002 * (\text{GDP per capita})$$
