Hypothesis: Does gender affect
depression and anxiety rates?

| | coef | std err |
|-------------------|--------|---------|
| Intercept | 0.6970 | 0.054 |
| depression_binary | 0.1316 | 0.091 |

| | coef | std err |
|----------------|---------|---------|
| Intercept | 0.7612 | 0.054 |
| anxiety_binary | -0.0553 | 0.093 |

Male = 0 ; Female = 1

Out of the 101 participants, females experience or report depression 0.1316 more times, and anxiety 0.053 less times compared to their male counterparts.
